

Mission Statement

Cathedral Village was founded with the support of the Episcopal Diocese of Pennsylvania as an independent nonprofit, nonsectarian Continuing Care Retirement Community, committed to promoting quality of life for each resident. Our aim is to encourage maximum independence; enhancement of dignity; financial security; personal choice; and optimal physical, psychological and social well being of the individual.

An integral part of each resident's life is his/her family, immediate or extended. Cathedral Village encourages the involvement of families and surrogates in the promotion of resident independence and dignity, and seeks open constructive communication with families and surrogates. The resident has the responsibility to respect the rights of other residents and of the staff.

Cathedral Village considers the staff to be an integral part of the community committed to the community's goals and in return recognizes its responsibilities to provide a safe working environment with fair compensation, and the opportunity to achieve personal satisfaction and occupational growth.

Cathedral Village is an integral part of Philadelphia County and the Delaware Valley and seeks to enhance the residents, businesses, arts and spiritual communities of these areas by providing a continuum of quality care and services, opportunities for employment and volunteerism; and by constantly working to be a good neighbor.

Through a cooperative interaction among its residents, management, staff, family and community resources, Cathedral Village strives to set the standard for active living and continuing care.
